

Top 10 Reasons To Choose Our Flap Discs

Viscoelastic

Flexibility in order to adjust to the workpiece increasing the contact area

Cost Effective

Reduces costs by vastly improving durability and increasing the removal speed.

*Saving Time.
Saving Money*

Ultra-Safe to Work with

Designed using the FEM, meaning maximising safety and strength while minimising materials used

No Glass Fibre

Improving the user experience by reducing injuries related to sharp fibre splinters

Trimmable Backing Plate

Due to the backing plate containing no glass fibre, allowing the user to prolong the life of the disc

Environmentally Friendly

Due to the backing plate of our flap discs being natural fibre our discs are CO² Neutral

Chemical & Heat Resistant

Making our discs usable for long grinding sessions without glazing.

Leaders in Innovation

We are continuously improving our flap disc range to stay miles ahead of the competition.

Cooler Grinding

Reducing the grinding temperature through innovative design allows higher removal rates than conventional flap discs.

High Tech Abrasive Cloth

Using only the best raw materials in our flap disc production. For outstanding removal and longevity
